Profil

Passionate and self-driven aspiring web developer with a strong interest in technology, business, and continuous learning. Skilled in building responsive websites using modern web technologies and committed to delivering clean, reliable, and user-friendly solutions. Currently seeking freelance opportunities to gain real-world experience while working toward my long-term goal of creating impactful technology businesses, particularly in the field of Internet of Things (IoT).

PROJECT

• Personal Portfolio Website

Developed a responsive personal portfolio using HTML, CSS, and JavaScript.

Deployed the website using GitHub Pages and Vercel.

Focused on responsive design, clean UI, and performance.

• Responsive Landing Page

Built a modern landing page with responsive layouts.

Applied semantic HTML, CSS Flexbox/Grid, and interactive JavaScript features.
